- ❖ Since the merger in H2 2014, the charter rates have been in a downward trend
 - Current 1-Year T/C rates for Capesize and Panamax vessels reached historical lows which is a reflection of:
 - Weak spot market
 - Oversupply of vessels available for period charter
 - Seasonally low period which increases spot rate volatility and uncertainty
- ❖ Having placed vessels on period in H2 2014 and H1 2015, would have locked-in record low rates for our vessels
- ❖ Historically in Q3 and Q4 we have stronger markets and higher T/C due to seasonality
- ❖ Therefore, we are continuously evaluating our chartering strategy and consider placing vessels in longer term time charters as rates become more attractive
